Introducing the YayValet ® Service Provider Network

Many YayValet ® local service providers can now use YayValet ® to receive service requests. By having customers use the yayvalet.com site and the Interactive Voice Response system (IVR). Customers can now contact a service provider and leave their contact information using the service providers SMS message mailbox and email address. For example, a customer calls into the YayValet ® IVR system and enters a predetermined PIN# and their contact number, the service providers cell phone and emails will receive a YayValet ® service request within seconds. Online requests can be submitted in detail to insure that all details are given by the customer allow the service provider to know what is expected in order to complete the service request. David Lidskin, President and COO of YayValet ® explained, "This technology will greatly enhance an organizations touch on the customer, or in the case of the "My Business" category offer services as a Professional Employer Organization". Mr. Lidskin continued, "My Business offers services such as human resource management, payroll administration, payroll tax compliance, employee benefits, and risk management. Our system can provide cost savings and in many cases improved operational efficiencies". For more information visit our website and fill out our online contact form or call us at 1-888-YAY-VALET (1-888-929-8253).
